

Ruwan Bandara

Software Engineer

I am a dedicated professional with five years of experience in Laravel and Vue.js, seeking an opportunity as a Software Engineer where I can further hone my skills. With a strong commitment to achieving results, I have consistently demonstrated the ability to complete tasks with determination and dedication. My technical skills, passion, and unwavering determination are essential qualities that make me a suitable candidate for this role

PROJECTS

CHAIRSYDE

Chairsyde is a state-of-the-art consultation platform helping dentists to boost case acceptance by enhancing patient understanding, informed consent, and risk mitigation using patient-friendly dental animations and contemporaneous tracking.

(country: United Kindom)

Technologies: Vue js, Nuxt js, Laravel , AWS, Vapor, Open AI - FullStack Developer

HYRE

Hyre is an integrated workforce platform that helps the NHS Primary Care build and manage a flexible, skilled and diverse workforce through collaboration and partnership.

(country: United Kindom)

Technologies: Vue js, Laravel - FullStack Developer

PRIMED

Fully functional B2B system for health sectors. PriMed's mission is to make aesthetic medicine accessible to every person striving for positive change.

(country: United Kindom)

Technologies: Vue js, Laravel - Frontend Developer

SOUQBOX -T-HUB

The B2B economy differs from B2C because everything is price negotiable. This means that for eCommerce to work, it must be an offer based trading platform. That is what the SouqBox T-hub platform has been designed to do.

(country: United Kindom)

Technologies: Nuxt js, Laravel - FullStack Developer
